Frequently Asked Questions on Microfinance and Millennium Development Goals

MADURAI SYMPOSIUM 2009

A Joint Initiative by

INFOS & INAFI-India

CONTENTS

- 1. Preface
- 2. About this booklet
- 3. Facts and figures on poverty
- 4. The Millennium Development Goals (MDGs)
- 5. Microfinance
- 6. Connecting Microfinance and MDGs & The way ahead

Preface

Microfinance is globally recognised as an effective instrument to address poverty and women empowerment. Microfinance is not a mere financial instrument but a powerful tool for development to address multiple dimensions of poverty by addressing the issue of health, education, gender and environment. The experience across India and other countries has shown a robust potential of Microfinance to integrate with the development issues thereby significantly impacting the lives of poor.

The Millennium Development Goals (MDGs) are globally-adopted targets for reducing extreme poverty by 2015. They address income poverty, hunger, and disease; lack of education, infrastructure and shelter; and gender exclusion and environmental degradation. The unique framework in which microfinance drives specific development outcomes creates a remarkable opportunity for the achievement of the MDGs. There exists always a natural interconnection between Microfinance and the MDGs as Microfinance fosters the achievement of many MDGs and plays a key role in many strategies.

In this backdrop, Indian Network of Federations of Microfinance Self Help Groups (INFOS), a national network of Microfinance SHG Federations and International Network of Alternative Financial Institutions (INAFI-India), an International network of Microfinance practitioner NGOs takes the initiative to bring together the women leaders of various SHGs and Federations from across the country and other development stakeholders in "National Summit of SHG Federations" scheduled during September 16-18, 2009. The National Summit of SHG is designed with the focus on Microfinance and Millennium Development Goals (MDGs) in view of its paramount importance in the priorities of the Development sector.

As part of this Summit, INFOS in association with INAFI-India takes an initiative to create awareness and sensitise the community federations and NGOs the need for MDGs and the role of Microfinance in contributing to achievement of MDGs through this booklet on Frequently Asked Questions (FAQs) in Microfinance and Millennium Development Goals. FAQs in MF & MDGs are listed questions and answers, all supposed to be frequently asked with regard to MDGs, and pertaining to role of Microfinance in achieving MDGs.

ABOUT THIS BOOKLET

Why

It provides basic answers to questions related to:

- The Millennium Development Goals (MDGs)
- Microfinance
- The role of Microfinance in achieving MDGs
- Connecting Microfinance and MDGs

For whom

This document is intended to SHGs, SHG Federations, NGOs, MFIs, Voluntary Organisations and other stakeholders such as Banks, Academicia, Donors/funding agencies and Government institutions involved in Microfinance programmes.

By whom

This FAQ booklet is a joint initiative of Indian Network of Federations of Microfinance Self Help Groups (INFOS) and International Network of Alternative Financial Institutions (INAFI-India).

Supporters and sponsors

- Sir Ratan Tata Trust, Mumbai
- National Bank for Agriculture and Rural Development (NABARD),
 Mumbai
- Ford Foundation, New Delhi
- HIVOS, Bangalore
- Small Industries Development Bank of India (SIDBI), Chennai

FACTS AND FIGURES ON POVERTY

1. What is the status of Poverty and hunger in India?

As per the central government statistics 27 in every 100 people live BPL. That is to say 42% of the people earn less that Rs.50/- day and the percentage of people earning less than Rs.100 is 85%. 25% of the populations are from Scheduled caste and tribes and in this 42% are very poor. Due to the inflation the prices of food articles have gone up and because of this there is actual food shortage leading to poverty.

2. States which have serious issues of poverty and hunger?

Bihar, Orissa, Uttar Pradesh and Madhya Pradesh are really suffering out of poverty.

3. How many people in India are living without food and proper health care

In India out of the total population of about 116 crores 20 crores live without food and proper health care.

4. How many children in India are weak?

50% of the children are weak and in this 20% have basic problems due to lack of food, shelter and clothing.

5. What is the ratio of women to men in India?

As per the statistics of 2001 the ratio of women to men is 1000:927

6. What are the issues faced by women in India?

There is no priority for women in the society in the areas of culture, economy. There is also no adequate law to protect women and dowry related deaths are more.

7. What are the steps taken by the Government of India in solving issues faced by women?

The Government of India is taking steps to inform the women as to their legal status and to avoid female infanticide. Plans are afoot to ensure the ratio of women to men at 1000:950 during the year 2016-17 and to reduce infant mortality rate (For example if 1000 children are born 67 children die before the age of 5 at the Indian level it is 122 during 2008).

8. What is the status of maternity in India?

As per the statistics of 2005, out of a 10,00,00 pregnant woman, 450 died during delivery of birth. Government of India has planned to reduce this to 100 before 2011 and 2012.

9. Status of HIV/Aids in India?

As per the statistics, around 2.5 crore people are affected by HIV and this is predominant in states like West Bengal, Orissa, Rajasthan and Bihar. TamilNadu has about 45% affected by HIV, this has a serious say amongst the women in rural and urban areas

10. Status of Tuberculosis in India?

As per the Government of India statistics of 2003, 33 people die due to T B and this disease is more amongst the poor people.

11. What type of security is needed for poor people?

Security from the point of view of society, income and food is the basic requirement for people living Below Poverty Line.

12. Define famine and hunger death?

If a person did not get food for atleast 3 times a day then he is supposed to be living in poverty. It is a saddening thing that large amount of population take or get only 1 to 2 time food daily.

13. Why women are affected in majority out of poverty.

- a) Women are not given adequate share in education and they are not employed in bigger organizations
- b) Majority of the women are engaged only in agriculture and agriculture related works
- c) Women gets lesser salary than men
- d) Job security is not there in those jobs where women are predominantly employed

14. Progress towards MDGs in India?

4. The Millennium Development Goals Report, 2009		

THE MILLENNIUM DEVELOPMENT GOALS (MDGs)

1. What is MDG?

MDG stands for Millennium Development Goals – a set of time-bound and measurable goals and targets for combating poverty, hunger, diseases, illiteracy, environmental degradation and discrimination against women. It consists of 8 goals, 18 targets and 48 indicators, covering the period 1990 to 2015

2. When and how did MDG start?

In September 2000, member states of the United Nations (UN) gathered at the Millennium Summit to affirm commitments towards reducing poverty and the worst forms of human deprivation. The Summit adopted the UN Millennium Declaration which embodies specific targets and milestones in eliminating extreme poverty worldwide. A total of 189 countries, including the Philippines committed themselves to making the right to development a reality for everyone.

Can the UN member states achieve the MDGs?

For most nations to achieve the MDGs, they must get not only additional financial resources from both domestic and external sources, but should also formulate policies and set up an institutional environment that will ensure that the resources are used efficiently and effectively

4. Specifically, what are the MDGs?

The UN aims that by 2015,

- the proportion of people suffering from extreme poverty and hunger will be halved;
- all children will be in primary school;
- girls will have the same educational opportunities as boys;

- the proportion of people without access to safe drinking water will be halved;
- the spread of HIV/AIDS and malaria will be stopped;
- a child's risk of dying before the age of five will be reduced by two-thirds;
- a mother's risk of dying while pregnant will be reduced by three quarters;
- the world's ecosystem and biodiversity will be better protected from destruction;
- at least 100 million slum dwellers will get better housing, health care, and new opportunities for education;
- people in developing countries will have greater access to essential drugs;
- the benefits of new technologies, especially information technologies, will flow to more countries and more people; and
- wealthy countries will support developing countries with debt relief, more financial aid, and greater market access.

5. How can the attainment of the MDGs be measured?

The attainment of the MDGs can be measured through a set of indicators defined by the UN that will be able to assess progress over the period 1990 to 2015.

1. What is Micro Credit?

Micro Credit is defined as provision of thrift, credit and other financial services and products of very small amount to the poor in rural, semi-urban and urban areas for enabling them to raise their income levels and improve living standards. Micro Credit Institutions are those, which provide these facilities.

2. What are the interest rates applicable?

The reform of the interest rate regime has constituted an integral part of the financial sector reforms initiated in our country in 1991. In consonance with this reform process, interest rates applicable to loans given by banks to micro credit organizations or by the micro credit organizations to Self-Help Groups/member-beneficiaries has been left to their discretion. The interest rate ceiling applicable to direct small loans given by banks to individual borrowers, however, continues to remain in force.

3. What are the terms & conditions for accessing micro credit?

Banks have been given freedom to formulate their own lending norms keeping in view ground realities. They have been asked to devise appropriate loan and savings products and the related terms and conditions including size of the loan, unit cost, unit size, maturity period, grace period, margins, etc. Such credit covers not only consumption and production loans for various farm and non-farm activities of the poor but also include their other credit needs such as housing and shelter improvements.

4. What is a Self-Help Group (SHG)?

A Self-Help Group (SHG) is a registered or unregistered group of micro entrepreneurs having homogenous social and economic background voluntarily, coming together to save small amounts regularly, to mutually agree to contribute to a common fund and to meet their emergency needs on mutual help basis. The group members use collective wisdom and peer pressure to ensure proper end-use of credit and timely repayment thereof. In fact, peer pressure has been recognized as an effective substitute for collaterals.

5. What are the advantages of financing through SHGs?

An economically poor individual gain strength as part of a group. Besides, financing through SHGs reduces transaction costs for both lenders and borrowers. While lenders have to handle only a single SHG account instead of a large number of small-sized individual accounts, borrowers as part of a SHG cut down expenses on travel (to & from the branch and other places) for completing paper work and on the loss of workdays in canvassing for loans.

6. What role does a Non-Governmental Organisation (NGO) play in provision of Micro Credit?

A Non-Governmental Organisation (NGO) is a voluntary organization established to undertake social intermediation like organizing SHGs of micro entrepreneurs and entrusting them to banks for credit linkage or financial intermediation like borrowing bulk funds from banks for onlending to SHGs.

7. Why Microfinance?

 Poverty reduction is possible on a large scale through the promotion of sustainable livelihoods – by providing easy and affordable (yet non subsidized) access to credit and related service required for promotion of livelihoods, micro finance has not only harnessed the latent entrepreneurial abilities of the poor but also enabled them to combat poverty in a sustainable manner.

- Empowerment of women can occur through social and collective action at the grass roots – the clout and solidarity provided by the SHGs and other forms of groups and collectives, pioneered by micro finance movements across the world, have helped the poor and women fight and secure their rights, both at home as well as outside. Thus, in a way, microfinance has strengthened democracy as the grass roots
- Enterprise development and large scale employment generation, as an end in themselves, can be promoted in remote rural areas – many of the poor who were eking out a living doing wage work have become entrepreneurs (in their own right) due to a wide variety of services that they can access through the microfinance system
- Local capital (resources) can be tapped in a significant manner to fund poverty alleviation programmes – many microfinance programmes deliver credit and related services to the poor out of their own savings
- Most importantly, all of the above can be achieved by the poor themselves

Why is Micro Finance growing?

- It promises to reach the poor: support income generation activities for their enterprises
- It can help in building financially self sufficient locally managed institutions
- It builds on the traditional systems of savings and storage. It provides similar services with greater flexibility, at a more affordable price and on a sustainable basis

- Microfinance activities can strengthen existing formal financial institutions by expanding their markets for both savings and credit
- It has received a lot of impetus by the growing number of success stories both in extending its reach to rural poor and becoming self sustainable institutions
- Over the years, it has been able to offer innovative products like using group based collateral, use of social and peer pressure and promise of higher repeat loans, reducing transaction costs drastically, achieving greater outreach and high loan repayments.

Who are the beneficiaries of Microfinance?

Poor women, small and marginal business entrepreneurs, small and marginal farmers, landless laborers and coolies, craftsman, Those who earn less, those who are deprived of basic amenities & those living in backward villages

Why is micro finance spreading fast amongst poor people?

- 1. Due to self less service and aims at providing basic infrastructure
- 2. To make the masses economically independent and helps the people to develop
- 3. It serves the people through various beneficial schemes
- 4. It ensures that through Micro finance the banking sectors performs effectively
- 5. It ensures all round development for people living BPL

Madurai Symposium 2009

The Madurai Symposium is a development platform where development stakeholdersCommunity Institutions, Civil Societies, the Government, Non-Government Organisations (NGOs), Financial institutions and Academiaconverge at Madurai for conventions, conferences and a development carnival. Three biennial symposiums were organized in Madurai in 2003, 2005 and 2007. The 2009 Madurai Symposium focuses on advancing development towards MDGs. People conventions, conferences and workshops will be organized on themes such as poverty, women and children, environment and global partnership. The Symposium is an opportunity for all the stakeholders of development to consolidate their experiences and field practices, share what they have learned, and establish an agenda for realizing the MDGs.

Millennium Development Goals

At the United Nations Millennium Summit in September 2000, 189 member countries of the United Nations adopted the Millennium Declaration, which outlines the Millennium Development Goals (MDGs) as the commitment pledged by governments of sovereign states to achieve 21 development targets and 60 indicators by 2015. The MDGs consist of eight specific goals to eradicate extreme poverty and hunger, ensure all boys and girls complete primary education, promote gender equality, improve the health of mothers and children, reverse the spread of HIV/AIDS, protect the environment, and create a global partnership for development.

INFOS

INFOS is a national network of Microfinance SHG Federations promoted with the mission of strengthening and sustaining SHG Federations in India. The Network aims at sharing a common mission of contributing towards growth of the member federations through capacity building and policy advocacy initiatives, facilitating co-learning and through inculcating self-regulation. INFOS was incorporated in June 2006 and has come to gain an identity among the SHG federations in the country and position itself as a strong and vibrant network engaged actively in building the social capital of the poor by enabling the demand stream comprising of SHGs and Federations through networking.

INAFI-India

INAFI INDIA is the country chapter of INAFI global network of development organisations active in support of savings and credit programmes of member organisations in Asia, Africa, Latin America and Eastern Europe. In realizing this vision, INAFI-India recognizes the critical role of microfinance interventions as part of the development strategy in eradicating root causes of poverty. For INAFI-India, microfinance is a 'means' to the larger end of poverty reduction and the interventions of INAFI and its members go beyond microfinance. As a network, INAFI and its members are challenged by the Millennium Development Goals and we are committed for a long-term work to connect microfinance with the MDGs.
