Focus of the Month

Contextualization

One of the prominent features of DHAN's working philosophy is contextualizing the thematic interventions so as to match with the requirements of native community. DHAN has its presence in all the eco systems wherein the cultural dimensions are keenly studied prior to the launch of interventions. Contextualization of thematic components is done through a participative mode wherein the community preferences get top primacy. The picture symbolizes the cultural dimensions of different eco system being appreciated by DHAN.

Focus of the Month

Moved Out of Poverty

Enabling the poor to move from **Poverty to Prosperity** is the primacy for entire institutions in DHAN Collective. The member's self declaration on moving out of poverty witnesses the impact of DHAN's interventions at large. Indeed, the systematic efforts of the federations in ensuring graduations for their member families pave a greater way for such self declaration. New working propositions are generated time to time to enable the poor families come out of poverty at a faster rate. It is highly necessary to track the poverty graduation at member level so as to customize the interventions based on their need.
