
Intervention in Agriculture Sector

**Post Tsunami Rehabilitation Programme
DHAN Foundation**

Target Families

- Tsunami Affected Farming Families
- Small and Marginal Families
- Agriculture Labourers and Fringe Communities

Intervention Strategies

- Field level assessment on damages with community participation
- Organising the community
- Supporting the affected people through their groups for the long term sustainability
- Promotion of nested institution for the long term development

Targeted Farming Families

- Farmers Affected by Tsunami
- Small and Marginal Farmers
- Agriculture Labourers
- Families involved in Agriculture allied activities

Crop Production

Promotion of Horticulture and Floriculture

Fodder Crop and Vermi-Composting

Equipments and Drying Yard

Organic Farming

Farm Pond for Life Irrigation

Pond Renovation and Inland Fishing

Renovation of Field Channel and Supply Channel

Small and Petty Trades

Bio-shield – Coastal Plantation

Mile Stone - CARC

The **Coastal Agriculture Resource Centre** was conceptually evolved after the tsunami disaster. The purpose of promotion is to evolve specific package of practices for the reclamation of tsunami affected lands in coastal areas, dissemination of research knowledge to the farmers for early restoration of productivity in agricultural lands and to document the research / reclamation processes.

Purpose

- **Protecting soil health**
- **Technical cropping support for the farming families**
- **Educating farmers on various farm machineries to reduce the cost of cultivation**
- **Encouraging the farmers to take up horticulture crop and organic farming**
- **Creating awareness on several agro eco systems through exposure visits to make them familiar to different crops.**
- **Experimental plots and field level demonstration for building the capacity of Farmers**
- **Conducting trainings, seminars and workshops to the farmers and staff to update their knowledge.**

Soil Test

Farm Field School for Farmers

Reach

■ Cropping Support	– 5514
■ Farm Implements	– 2543
■ Motor Pump & Well for Irrigation	– 72
■ Farmers Reached through CARC	– 2360
■ Renovation of Farm Ponds	– 234
■ Channel Desiltation	– 2532
■ Fish rearing in ponds	– 94

Thank You
